

Rivvit

technology partners

At Rivvit, we address the challenges of migrating Notes Domino database applications. By leveraging our purpose-built enterprise solutions, organizations can eliminate the risks and costs associated with supporting legacy HCL (Lotus/IBM) applications, while providing end-users with a modern web application experience.

Why Migrate?

80%

Companies using Notes that have migrated, started a migration, or are planning to migrate.

25%

Domino application databases being maintained to preserve data to address compliance, historical, or business continuity purposes.

Expert resources in Notes are becoming increasingly difficult to find and therefore more expensive. Migration opens your organization to a deep and growing resource pool.

Our Solutions

Our Services

Migrate Me

APPLICATION MIGRATION SERVICES

Migrating your mission critical complex applications

Rivvit has dedicated the past ten years to refining the process of migrating Notes Domino Applications. Our industry-first solutions and hardened migration practice ensure a swift migration of even your most complex Notes Domino application.

We know your problem, your options, and how to finish.

And we do it all with no license costs to you.

APP|ANALYSER

Our **free** assessment helps you gain valuable insight into the importance, use, and complexity of each and every database to make informed migration decisions.

NO COST

DCOM

Archive applications to reduce migration scope and preserve the long-term accessibility to legacy Notes data.

30 MINUTES / DATABASE

REVIVE

Complex Notes Applications need a purpose built solution. Migrate them to an open and non-proprietary web framework that you can support long term.
